## Message from Director

**Dear Respected parents and students,**

*Happy New Year and welcome to the year 2026 with new hopes and aspirations.*

*We look forward to another great year ahead as we step into 15th year since the inception of the National Curriculum under the CGS banner. We have been successful in adding new dimensions to educating our students. We have become full members of the Round Square association, and many of our students have participated in various conferences which opened the horizons of their learning. Thank you, parents, for allowing your children to participate in RS conferences at home and abroad.*

*CGS has a tradition of selecting meaningful themes for learning every year, and last year the powerful theme was "Together We Rise." Our students learned as we integrated it into our curriculum, through various activities, and especially through the annual cultural program.*

*Since last year, CGS NC has also been actively taking part in all our environment-related activities. You must have noticed how our students are becoming more and more aware of our planet and its future. We learn to make the right decisions and choices to preserve our beautiful world as worthy citizens.*

*We continue to place a strong emphasis on sports activities, actively participating in inter-school tournaments for cricket, football, chess, and basketball. We are also proud of our girls' futsal and basketball teams. The enthusiasm displayed by our girls has encouraged us to provide better facilities to improve their skills and grow their talents in sports.*

*Furthermore, events like the Science Fair '25 and Art Exhibition '25 have played a crucial role in fostering creativity and developing critical thinking among our students. As a result of these initiatives, our students are now able to compete with international students and confidently secure their place on the global stage.*

*Additionally, our Student Cabinet plays a vital role in our school community. They are hands-on involved in various aspects of school life, assisting with and promoting events. Their dedication extends beyond the campus as they actively lead fundraising drives for the community and support relief efforts during natural disasters.*

*I hope we all put our efforts into making this planet and our country a better place to live in.*

*We hope you all had a restful, fun-filled winter holiday and enjoyed the beautiful weather. Wishing you all a very good year ahead with good health and happiness.*

Warm regards,  
**Farhat Khan**  
Director, CGS

## Message from Headmaster

### A Warm Welcome to the New Session: Building Partnerships for Success

Dear Students, Parents, and Guardians,

As we stand on the threshold of a new academic year, I am delighted to extend a heartfelt welcome to all of you as we embark on the CGS National Curriculum session beginning in January 2026. This is not just another year; it is an opportunity for growth, discovery, and shared achievements. Whether you are returning to our vibrant community or joining us for the first time, I assure you that our school is committed to fostering an environment where every student can thrive academically, emotionally, and socially.

At CGS, we believe that education is a collaborative journey. The foundation of our success lies in the strong relationships we build between the school, our dedicated staff, our enthusiastic students, and you, the parents and guardians. Your involvement is invaluable—your insights, support, and encouragement play a pivotal role in shaping the experiences of your children. Together, we can create a nurturing atmosphere that inspires curiosity, resilience, and excellence.

To make this year truly transformative, I urge parents to join hands with us in several key ways. Regular communication is essential; please feel free to reach out through our open-door policy, parent-teacher meetings, or our digital platforms. Share your observations about your child's progress, interests, and challenges so we can tailor our approach accordingly.

By working in partnership, we can address challenges proactively, celebrate milestones, and ensure that every student feels supported. This collaboration will lead to the betterment of the year, resulting in well-rounded individuals who are prepared for the future. Remember, a strong school-parent alliance is the cornerstone of student success.

I look forward to a year filled with innovation, joy, and mutual respect. Let's make 2026 a year to remember!

Warm regards,  
**Tohsin Khan**  
Headmaster

### Beyond the Classroom: Celebrating DofE Achievements & Global Round Square Opportunities

#### Dear Students,

At Chittagong Grammar School National Curriculum, we are dedicated to provide you with opportunities that build character, resilience, and global citizenship. I am writing to update you on the tremendous success of our Duke of Edinburgh's International Award (DofE) programme and to introduce exciting new horizons through Round Square.

#### The Duke of Edinburgh's International Award (DofE) Update

Our DofE program is thriving, with students pushing their limits and serving their communities.

#### Celebrating Success & Growth

- 2025 Achievements: We have proudly awarded 33 Bronze Certificates to the 2025 batch. This cohort successfully completed their Adventurous Journey at Base Camp.
- Current Enrollment: The momentum continues with 34 students currently enrolled in the Bronze Award and 19 students progressing to the Silver Award for 2026.
- Recent Adventures: Our 2026 batch recently returned from a challenging and rewarding expedition to Mati-ta.

#### Why Join DofE?

The Award is a personal challenge, not a competition against others. It pushes you to:

- Discover new talents and passions.
- Build confidence and resilience essential for future success.
- Make a difference in your community.

#### Our Activities

We provide a comprehensive range of activities to help you complete your Award sections:

- Skills: Compulsory: First Aid, Cooking, Route Planning & Navigation, Team Building. Electives: Farming, Gardening, Photoshop & Illustrator, Coding, Candle Making, Debate, Chess, and Music (Tabla, Harmonium, Guitar, etc.).
- Physical Recreation: Sports: Cricket (Tape Tennis/Short Pitch), Futsal, Basketball, Handball, Table Tennis. Fitness: Gym, Yoga, Pool, and Karate.
- Service: Student mentoring, Tree Plantation, Clothes/Food distribution, Community cleaning drives, and Skills sharing with the Upolobdhi Foundation.

## Round Square: Connecting with the World

In addition to DofE, our membership in the Round Square network offers you the chance to collaborate with students from around the globe.

### 2025 Windermere Conference Highlights

This year, a joint delegation of 10 students from CGS and CGS NC attended the "Beyond the Horizon" Round Square Conference in the UK, hosted by Windermere School.

- **Conference Experience:** Students explored the themes of Environmentalism and Kindness. Their itinerary included Keynote speakers, Baraza group discussions, and a Kindness Workshop. They also participated in environmental water sports on Lake Windermere, enjoyed music around the fire, and completed a sunrise walk to Orrest Head.

**Cultural Expedition:** Following the conference, the delegation enjoyed a post-conference tour visiting iconic locations including Windsor Castle, Bath, Stonehenge, and various museums and city tours.

### Upcoming Opportunities for You (2026)

We are excited to announce multiple avenues for you to get involved this year, with conferences spanning several continents:

#### February: CheongShim International Academy, South Korea.

- **Dates:** February 8 – February 12, 2026.
- **Age Group:** 14–18 Years.
- **Experience:** Engage with students at a leading international boarding school known for its "Altruistic Mind, Creative Knowledge, and Global Leadership" curriculum.

#### March: The Emerald Heights International School, Indore, India.

- **Dates:** March 6 - March 8 2026.
- **Age Group:** 13–15 Years.
- **Experience:** Participate in a vibrant exchange of culture and ideas at one of India's top boarding schools, focusing on adventure and holistic development.

#### June: Hilton College, South Africa.

- **Dates:** June 28- July 2, 2026.
- **Age Group:** 14–16 Years.
- **Experience:** A unique opportunity to visit the KwaZulu-Natal Midlands and engage in service and adventure activities in a stunning setting.

#### October: Barker College, Sydney, Australia (RSIC 2026).

- **Dates:** September 28 – October 4, 2026.
- **Age Group:** 16–18 Years.
- **Theme:** "Visions of the Future from an Ancient Land."
- **Experience:** The prestigious Round Square International Conference (RSIC) celebrating 60 years of the network.

#### Virtual Collaborations:

For those unable to travel, you can still connect globally through:

- RS Postcards
- Language Labs
- History Labs
- Geography Labs

These programs are designed to take you out of your comfort zone and into a world of discovery. I encourage all of you to review these options and consider how you can participate in the coming year.

Warm regards,

**Raheel Jamal**

## Message from Assistant Head (Secondary)

Dear Students,

As we welcome the New Year, I wish each of you joy, good health, and new opportunities. May this year bring you closer to your goals and fill your days with positivity and growth.

Let us begin the year with meaningful resolutions—promising to stay disciplined, be kind to ourselves and others, and strive for steady progress every day. A new year is a fresh start, a chance to reflect, refocus, and rise stronger.

Today I will give some guidance for Board Exam preparation as Board exams are not just a test of knowledge—they reflect your consistency, planning, and ability to stay calm under pressure. It is a significant milestone, and the right approach can make all the difference. Start by creating a realistic study routine that covers all subjects and allows time for regular revision. Break the syllabus into manageable parts and set achievable daily goals. Understand your syllabus thoroughly and focus on the chapters that carry more marks. Instead of memorising everything, aim to understand concepts—this helps you to remember better and reduces stress.

Regular practice of past papers and timed mock tests will help strengthen your exam technique and build speed and accuracy. This also familiarises you with the exam pattern. You can make short notes for quick revision and highlight key formulas, definitions, and diagrams. Stay consistent rather than trying to study everything at once.

Alongside academics, remember to maintain healthy habits—sleep well, eat balanced meals, stay hydrated and take short breaks to refresh your mind. With discipline and a positive mindset, you can perform your best in the board exams. My warmest wishes for your bright future ahead.

Thank you.

**Ishrat Jahan**

Assistant Head (Secondary)

## Message from Assistant Head (Primary)

Dear Parents,  
Greetings!

A new year stands before us like an open sky—vast, full of promise, waiting to be explored. And beneath this sky, our children walk forward with brave little steps, carrying dreams that are still growing wings. Some dreams whisper softly, some shine brightly, but every dream is precious and possible. As parents and educators, we are the wind behind those wings. Together, we can lift our children higher than they ever imagined. With that shared mission, I offer a few gentle inspirations for the journey ahead:

### **Let Every Morning Begin with Purpose**

A child who arrives at school regularly and on time begins the day with confidence. Your effort to ensure punctuality plants in them a lifelong habit of discipline and responsibility.

### **Create a Little Corner for Learning at Home**

A quiet moment of revision, a table free of distractions, and a few encouraging words from you can turn homework into an opportunity for growth. Your presence—more than anything—makes learning meaningful.

### **Hold Their Digital World with Care**

In an age where screens glow brighter than stars, your gentle guidance helps children remain grounded. By limiting screen time, you give them focus, imagination, and restful sleep—treasures far greater than any device can offer.

### **Plant the Seeds of Greatness Through Values**

- Teach them to be kind in moments of choice,
- brave in moments of fear,
- and honest in moments of doubt.
- These virtues will guide them long after the lessons of textbooks fade.

### **Keep the Doors of Communication Open**

A simple message, a meeting, a small update—your communication builds a bridge between us. Together, we can better understand your child's needs and celebrate their achievements.

### **Encourage Gentle Preparation, Not Pressure**

Tests and assessments are milestones, not mountains. Inspire your child to prepare regularly and calmly, reminding them that effort matters more than perfection.

- Tell them it is okay to fall,
- okay to feel unsure,
- okay to try again.
- What matters most is the courage to continue.
- Every masterpiece begins with a single imperfect stroke.

### **Nourish Them with Care**

A wholesome breakfast, a balanced tiffin, and a reminder to drink water equip them to learn with energy and joy. Healthy habits today grow into strong foundations for tomorrow.

Dear Parents,

This year, may we inspire our children to dream boldly, to work with passion and to believe deeply in their own strength. The world is waiting for their light—and together, we will help that light shine bright and true.

Warm regards,

**Jamila Akter**

## Message from Event Manager

*Late Ms. Farida Chowdhury, former Head of CGS NC, was an exemplary educator whose dedication and passion for teaching touched the lives of countless students. As a mentor, guide and role model, she inspired those around her with her kindness, wisdom and unwavering commitment to excellence. She consistently encouraged her students to push beyond their limits, nurturing their confidence and helping them discover their true potential. In every lesson, she ensured that each child experienced progress and a sense of achievement. Her patience, warmth and genuine love for learning created a classroom environment where students felt valued and motivated. Her legacy will continue to live on in the hearts of her students, colleagues and the entire school community.*

*She was also the finest guide for teachers. Under her leadership, many educators grew in both skill and confidence. She generously shared her expertise, encouraged collaborative learning and empowered teachers to refine their craft. By setting high standards and modeling professionalism, she helped shape a culture of excellence within the staff. Her guidance not only strengthened individual teachers but also enriched the entire academic community, a legacy that continues to influence the school long after her tenure.*

*She will always be remembered for her service, dedication, commitment and the love she showered upon us.*

## Message from English Department

### Welcoming a Bright New Year:

### May 2026 Inspire Us to Read More and Grow Together

*Reading books is one of the most enriching habits a learner can cultivate, as it broadens knowledge, strengthens language skills, and opens the door to diverse ideas, cultures, and perspectives. Regular reading improves concentration, enhances memory, and builds a rich vocabulary, enabling individuals to think critically and communicate with clarity. It nurtures empathy by allowing readers to experience different emotions and viewpoints, while also boosting creativity and imagination. Moreover, reading supports academic success, sharpens analytical skills, and naturally improves writing ability through exposure to well-crafted language. In a world dominated by screens, books offer a healthy, calming escape that reduces stress and encourages disciplined study habits. Ultimately, the habit of reading shapes thoughtful, confident, and well-informed individuals, laying a strong foundation for lifelong learning and personal growth.*

*Hope this new year encourages all of us to read more books, explore new ideas, and gain abundant knowledge throughout 2026.*

## Message from CGS NC Alumni

*My journey into the MBBS programme began with a simple but strong love for science. Growing up, Biology and Chemistry were the two subjects that truly fascinated me. Nothing else captured my interest the way the human body did. From how cells work to how surgeries save lives. This early curiosity slowly turned into a dream, and by the time I reached college, I could clearly imagine myself becoming a doctor one day.*

*Right after my HSC exams, I didn't waste a single day. I started preparing for the medical admission test with full dedication. Even though I studied in English Medium, I chose to prepare in Bangla because many previous medical exam questions had mistakes in their English translations. I didn't want to take any risks.*

*During the admission phase, I spent long hours studying every day. I focused on the basics of Physics, Chemistry, and Biology, solved previous years' questions, and took model tests to check my preparation. Those months were not easy. But I kept going. I think one of the biggest reasons I succeeded was consistency. Even on days when I felt tired, lost or unsure, I didn't give up. And whenever I needed help, my seniors, classmates, and teachers guided me and reminded me that I wasn't alone in this journey.*

*But the real challenge begins once you enter medical college. Medical life is no joke. You miss family outings, cancel hangouts, and sacrifice moments you can never get back. Time management becomes your best friend, and patience becomes your strongest skill. The people you surround yourself with will shape your experience, so choosing the right friends is important. Through these years, I have seen myself and my batchmates face breakdowns, failures, and difficult moments but I have also seen strength, growth, and resilience.*

*Today, as a final-year MBBS student of Institute of Applied Health Sciences, I look back and realize how far I have come. Clinical postings, real patients, and hands-on experience have taught me lessons no textbook ever could. I discovered a deep love for surgery- the precision, the responsibility, and the chance to save lives with your own hands. It feels like everything I loved as a child has finally found its purpose. Looking ahead, I hope to build a career in surgery abroad, learn in advanced medical settings, and bring that knowledge back to serve people with even more compassion and skill.*

*To all my juniors reading this, I want you to know one thing: Medicine is not just a degree. It is a journey of sacrifice, strength, consistency and endless learning.*

*There will be days when you feel broken, but also days when you feel proud. If you truly have the passion, hold on to it tightly. These years will test you, challenge you, and sometimes break you. But if you stay focused and committed, every sacrifice will be worth it. And one day, you will realize that the dream of serving people is the greatest motivation of all. I wish my juniors all the best. Stay focused, stay consistent and don't give up. You will surely make it.*

### A Journey of Struggles, Prayers, and Perseverance – My Road to Engineering

*Every journey begins with a dream—and mine began within the familiar classrooms of Chittagong Grammar School, NC. Those years shaped my foundation, and with the grace of Allah, I passed SSC with a GPA of 5. After that, life took me to Cantonment English School and College, where the real pressure began. I knew I had to work harder than ever before. My goal was not just to achieve good grades but to build a future that would make my parents proud.*

*After college, I faced one of the toughest phases of my life. Like many students in Bangladesh, I stepped into the battlefield of competitive public university admission tests. I sat for BUP, MIST, ISSB, DU, Medical, CU, GST—one after another—hoping for success, praying for guidance. I didn't always succeed, but every attempt taught me something valuable. I learned patience, resilience, and the art of standing up after every fall. During this time, I also took the IELTS exam and scored 7.5, but deep down, my heart remained committed to engineering. I loved solving problems, understanding systems, and imagining better solutions for the world around me.*

*And then, by the mercy of Allah, the door finally opened. I was accepted into the Civil Engineering Department of Chittagong University of Engineering and Technology. That moment felt like a reward for all the nights of hard work and all the sincere prayers I had whispered. My parents were proud, and I felt that my journey had truly begun.*

*Life at an engineering university is not easy—far from it. The workload is heavy, the expectations are high, and the pressure sometimes feels overwhelming. But with the support of my friends, the constant encouragement of my parents, and the blessings of the Lord of the Worlds, I continue to push forward. There have been ups and downs, moments of doubt, and moments of joy. But every challenge made me stronger. Today, I am in my final semester, majoring in Water Resource Engineering and minoring in Transportation Engineering. As I prepare for the next chapter of my career, I remain committed to working hard and leaving the rest to Allah. He honors whom He wills, and all good belongs to Him.*

#### *My Advice to Juniors*

*To all my juniors reading this:  
Never give up, no matter how difficult your path becomes. Success does not come overnight—it is earned through hard work, patience, and unwavering determination. Be honest in your efforts, follow your passion, and work wholeheartedly toward your goals. Don't fear failure; every setback is a lesson designed to make you stronger. And most importantly, put your trust in Allah. Do your best, and He will take care of the rest.*

*Life is a journey of faith, courage, and resilience. Keep moving forward. Your time will come, InshaAllah.*

### From the Classroom to the OR: My Journey into Oral and Maxillofacial Surgery

*"Before you tell your life what you intend to do with it, listen for what it intends to do with you"*  
-Parker J. Palmer

Choosing a career rarely comes with certainty. For me, the moment of clarity came under the harsh white lights of an operating theatre, calm and quiet except the steady beeping of the monitor, standing at the edge of the table watching my professors, gowned and gloved, putting together shattered bones of a patient who suffered severe facial injury. Every moment was deliberate, every millimeter mattered. Watching order slowly emerge from chaos, that moment didn't just fascinate me, it anchored me. So many people in our country still have little awareness of this side of dentistry, thinking it is only about cleaning, filling and root canals.

Hi! I'm Raik, a final year student at Chittagong International Dental College studying to become a Dental Surgeon. For me, oral and maxillofacial surgery proved to be the perfect intersection of precision, problem-solving and human service, a field where our decisions can impact how someone eats, speaks, smiles and lives.

#### How I prepared myself

After completing my HSC exams and while waiting for admission into dental college, I focused on turning fascination into preparation. I spent hours building strong study habits, attended countless mock MCQ tests and most importantly, learnt from my mistakes. Conversations with friends and mentors helped me understand the path I was about to embark on.

#### What this career path entails

This field demands consistency and the constant thirst for knowledge. I currently attend classes and wards, learn a handful from real life cases at the hospital and sharpen my clinical skills until they are instinctive. Truth be told, there are long sleepless nights of studying for tough exams and days when nothing seems to work the way it should. But progress comes from discipline and refusing to let setbacks define me.

#### Coping with university life

University can overwhelm each and every one of us. Suddenly you are balancing labs, lectures, exams, deadlines, friendships and most importantly, your grip on why you started this journey in the first place. But what drove me onward was the unwavering pull of the future I'm fighting for, a destination compelling enough to cut through the noise, fatigue and the relentless pressure of these merciless semesters.

Dentistry isn't a single lane. It's an entire medical ecosystem built around precision, diagnosis and the art of restoring function and esthetics. From managing trauma, infections and oral cancer to handling root canal treatments and fillings for tooth most people consider lost, restoring teeth with crowns, bridges, dentures, implants and correction of misaligned teeth using braces that most people are familiar with.

If you wish to pursue dentistry as a profession, I wouldn't recommend it unless you are willing to embrace long study hours, develop steady hands and keep an open mind to continuous learning throughout your life. This field rewards those who enjoy precision, problem-solving and the quiet satisfaction of restoring someone's confidence through their smile.

In the end, the most crucial step in your career is choosing a path that aligns with who you are and who you aspire to become. The right career isn't a mere title or a paycheck; it's a lifelong companion that gives your effort meaning and your sacrifices purpose. Adversities will come, doubt will creep in and the path you choose will test you more than once. But if the destination is truly yours, be patient and stay the course.

**Raik Rahman**

## Message from CGS NC Alumni

*I think I can speak for everyone from my batch when I say that our HSC phase was full of uncertainty. On one hand, we had to continue preparing for the board exams, and on the other hand, we had to keep up with admission tests. As a typical science student, I was expected to study for engineering or medicine, which meant a lot of material and more uncertainty. But I had decided that IBA DU is a good public university and I would at least appear for the exam, even though I had no plan to take any preparation.*

*But something flipped in me when I started going through the study material of IBA. Puzzles were fun, data sufficiency was something I had heard of for the first time, and even though I had to put in extra effort for English, it wasn't bad. Plus, I always liked Maths. Definitely not calculus. But I realized two things – I was enjoying studying for something, and I was actively figuring things out on how to take a better prep. Basically, I was taking initiative. The seniors I interacted with made me realize that I want to be a part of this community, study at this place, and build a career. Coincidentally, HSC was cancelled right after I decided to take preparation for IBA only and not pursue anything else. Yes, I still take it as a sign from the Almighty.*

*The most difficult part of it was waiting and being consistent. The exam date was announced almost a year later. But I kept telling myself during that time that this was the only opportunity for me. So, even if it was for 10 minutes a day, I studied for IBA. Stress was always a part of it. What if I didn't make it even after all this effort? When I was a Maths Instructor at Mentors, my students had the same anxiety. My theory was that even after all the effort, fate will have its part. None of us can control the latter. So, it's better to control the former and pray for it.*

*Fast forward to 4 years later, I graduated from IBA with a major in Finance. Again, I liked Maths. And I felt that being in Finance would help me have a better impact on business functions more than anything.*

*The reason why most of this article is about my admission prep is that I believe that was a defining moment in my life. The decision Allah led me to has helped evolve in a lot of ways. I wrote and published my first article after getting into IBA. I performed in events, realized that I am more of an ambivert than an introvert, and I realized you could learn so much from even just observing people.*

### **What Should You Do If You Want to Study at IBA?**

*I think it's safe to dedicate 2-3 hours every day right after you are done with your HSC. Start going through some basic concepts of Maths like profit & loss, mixture, ratios, percentages, and so on, learn Grammar rules from Cliff's TOEFL, and watch a few videos on puzzle solving, critical reasoning, and data sufficiency.*

*Once you are aware of the syllabus and the concepts, you can start solving problems from GMAT and GRE resources. In my opinion, GMAT is better for Maths, Data Sufficiency, Sentence Correction, and Comprehension. On the other hand, the GRE BIG BOOK has good practice sets for vocabulary, puzzle solving, and critical reasoning.*

*Try to study all 3 subjects every day in the 2-3 hours you have allocated. Most people either keep on solving Maths or English problems. But keeping up with all 3 right from the start is better. Start improving your vocabulary with Word Smart. Learn 10 words every day. Word of Advice: There are a lot of experts talking about a lot of resources on the internet. Too much information can be counterproductive. Pick one resource, complete it, then move to the next one.*

### **University Advice?**

*Once you get into a university, a lot of your ideas will be reinforced, but a lot of them will be shunned. Keep an open mind and never be judgmental. You have your own ideas, and people will have their own. They might not match, which is alright. But whatever happens, never support anything your conscience doesn't support just because most people are on the wrong side of things.*

### **Advice to My Juniors**

*I am 25 years old. Not experienced enough to give life advice. But watch One Piece. Watch movies. You can start by watching the Goodfellas, Heat, and Whisper of the Heart. Watch everything Scorsese and Tarantino have made. There are better TV shows than the typical ones. Watch the Sopranos and the Wire. The Studio is pretty entertaining as well. Movies, anime, and TV shows can make you think of things that are far better than the anxiety of life. "Life moves on pretty fast. If you don't stop and look around once in a while, you could miss it." - Ferris Bueller's Day Off*

## Message from CGS NC Alumni

*Sitting in my school uniform, struggling with my homework and dreaming about the future, I never had the idea how far my journey would take me. Today I am a 4<sup>th</sup> year MBBS student. The road is hard, the nights are long and the responsibilities are heavy. Yet, I choose to walk on this path every day because I was once taught the values of Courage, Generosity and Service.*

*Nine years in my school quietly shaped the person I am today. Those years taught me discipline through routine, confidence through expression and resilience through challenges. I was taught to manage pressure, respect time, work consistently and believe in my own potential. These qualities now form the foundation of my life as a 4<sup>th</sup> year MBBS student.*

*This confidence did not appear overnight-it was carefully built by my teachers, step by step. They did not only teach us lessons from books; they went out of their way to help whenever they could, giving extra care, encouragement and support.*

*How can I ever forget about the warmth of our cultural programmes, national days, and workshops- moments where learning felt alive beyond books? I was never someone who naturally sought the spotlight, and public speaking did not come easily to me. Yet, through recitations, singing, dancing, hosting and stage performances, I gained a quiet confidence that I did not even realize I was building. Over time, I discovered that I could face an audience, express myself, and overcome my hesitation-something that now helps me deeply in my medical journey as well. Looking back, I understand that my teachers were not just preparing me for events on stage; they were preparing me for life and I try to carry this with deep gratitude and humility today.*

*The projects and memory books we were asked to create once felt like simple school tasks. At that time, I did not understand why we were doing all these things, but today everything makes sense. I realize they were quietly teaching us reflection, creativity and self-awareness.*

*Alongside academics, my school gave deep importance to extracurricular activities, helping us explore interests beyond the classroom. These experiences taught me leadership, teamwork and communication-which now help me while interacting with patients, professors and seniors.*

*Medical education is intense but I realize that my school had already trained my mind to survive pressure without losing hope. I remain deeply grateful to my school for guiding me toward the person I am today and the doctor I aspire to become tomorrow.*

Mrinmoy 7<sup>th</sup>, Muhaimen 15<sup>th</sup>, Miftahul 18<sup>th</sup>, Rafiul 23<sup>rd</sup>, Rayyan 27<sup>th</sup>, Rafsan 31<sup>st</sup>

---

### Dear Students,

*This New Year, let us resolve to become better versions of ourselves. We will focus on our health, work harder toward our goals, and stay positive even in difficult times. Let us learn from our mistakes and make this year meaningful and successful.*

Thank You.
